Subject Index to Volume 12

Accuracy 12 (1989) 1, 313
Aircraft 12 (1989) 123
Algorithms 12 (1989) 259
Automatic visual inspection 12 (1989) 31
Automation 12 (1989) 241

Batch distillation 12 (1989) 299
Batch separations 12 (1989) 299
Batch simulation 12 (1989) 299
Bézier curves 12 (1989) 259
Bézier technique 12 (1989) 67
Block-triagonal matrices 12 (1989) 227
Blocking phenomenon 12 (1989) 227

CAD 12 (1989) 23, 59, 185, 203
Calibration 12 (1989) 307
CAM 12 (1989) 59
CAPM 12 (1989) 59
CCD cameras 12 (1989) 307
Cell 12 (1989) 73, 203
Central computer 12 (1989) 285
Chemical plant utilities 12 (1989) 153
CIM reference architecture 12 (1989) 131
CNC 12 (1989) 73
CNC controllers 12 (1989) 329
CNC machines 12 (1989) 329
Collaboration in meetings 12 (1989) 95
Command interpreter 12 (1989) 329
Company economic model 12 (1989) 131
Compensation models 12 (1989) 1, 313
Computer 12 (1989) 335
Computer-aided design 12 (1989) 23, 59, 185, 203
Computer-aided design/manufacture 12 (1989) 59
Computer-aided geometric design 12 (1989) 67
Computer-aided production management 12 (1989) 59
Computer-based instrumentation 12 (1989) 13
Computer communication 12 (1989) 215
Computer education 12 (1989) 59
Computer integrated manufacturing 12 (1989) 131, 241
Computer network system design 12 (1989) 141
Computer simulation 12 (1989) 153
Computer-supported co-operative work 12 (1989) 95
Connected graph 12 (1989) 193
Construction industry 12 (1989) 355
Control software 12 (1989) 329
Controller 12 (1989) 73, 215
Convex hull 12 (1989) 43
Convex polyhedron 12 (1989) 43
Convex set 12 (1989) 43
Cost–benefits tracking 12 (1989) 131
Critical success factors 12 (1989) 131
Cycle 12 (1989) 193

3-D object representation 12 (1989) 193
Database 12 (1989) 335
Design 12 (1989) 123
Developing countries 12 (1989) 59
Diameter 12 (1989) 43
Digital terrain model 12 (1989) 203
Discrete manufacturing processes 12 (1989) 107
Distant and synchronous meetings 12 (1989) 95
Distributed computer systems 12 (1989) 95
DNC control 12 (1989) 329

End effector calibration 12 (1989) 313
End effector testing 12 (1989) 1
Error compensation model 12 (1989) 313
Errors 12 (1989) 1, 313

Factory of the future 12 (1989) 215
Features 12 (1989) 185
Finite buffers 12 (1989) 227
Flexible fixturing 12 (1989) 241
Flexible inspection system 12 (1989) 31
Flexible manufacturing systems 12 (1989) 141, 241
FMS 12 (1989) 141, 241

G codes 12 (1989) 329
Gradient identification 12 (1989) 253

Hierarchical control 12 (1989) 141, 215
Home automation 12 (1989) 355
Homogeneous coordinates 12 (1989) 307
Host microcomputer 12 (1989) 285
Human integrated manufacturing 12 (1989) 131
Human–computer interface 12 (1989) 13
Hydraulic turbine 12 (1989) 49

Industrialization growth 12 (1989) 59
Integrated automation system 12 (1989) 355
Integrated CADCAM 12 (1989) 123
Integrated system 12 (1989) 285
Integration 12 (1989) 131
Intel 8097 12 (1989) 73
Intersections 12 (1989) 259

Kernel of the integrated system 12 (1989) 285

Large sparse matrices 12 (1989) 227
Line drawing 12 (1989) 193
Lotus 123 12 (1989) 253

Machine vision 12 (1989) 31, 193
Manufacturing 12 (1989) 123, 335
Manufacturing control 12 (1989) 241
Manufacturing structure and infrastructure 12 (1989) 131
Master 12 (1989) 215

Elsevier Science Publishers B.V.
Computers in Industry 12 (1989) 383–384

Matrix geometric form 12 (1989) 227
Measurement 12 (1989) 1
Mesh generation 12 (1989) 203
Metrology methods 12 (1989) 1
Microprocessor 12 (1989) 285
Modelling 12 (1989) 335
Multiple-view representation 12 (1989) 193
Multistation production lines 12 (1989) 227

Networking 12 (1989) 355
Nonlinear optimal control 12 (1989) 49
Numerical control 12 (1989) 73

Office automation 12 (1989) 355
Open queueing networks 12 (1989) 227
Operating system 12 (1989) 285

Parameter identification 12 (1989) 253
Parametric CADCAM 12 (1989) 123
Parametric shape representation 12 (1989) 185
Performance analysis 12 (1989) 141, 347
Performance specification 12 (1989) 347
Personal computers 12 (1989) 329
Petri net 12 (1989) 347
PL/M-96 12 (1989) 73
Point-wise coordination 12 (1989) 285
Position sensing 12 (1989) 307
Positioning performance 12 (1989) 1
Printed circuit board 12 (1989) 31
Process flowsheeting 12 (1989) 23
Production 12 (1989) 335
Production management 12 (1989) 59

Quasi-Birth–Death process 12 (1989) 227
Queueing network 12 (1989) 141, 227
Quintic curve formulation 12 (1989) 67

Real time system 12 (1989) 347
Robots 12 (1989) 1, 43, 285, 313
Robot positioning performance 12 (1989) 313
Robotics 12 (1989) 241, 355

Self-intersections 12 (1989) 259
Sequential modular approach 12 (1989) 23
Shape parameter 12 (1989) 203
Simulated annealing 12 (1989) 31
Simulation 12 (1989) 23, 141, 153, 299, 335
Slave 12 (1989) 215
Smallest convex set 12 (1989) 43
Software automation 12 (1989) 107
Solder paste 12 (1989) 31
Solid modeling 12 (1989) 185
Specification language 12 (1989) 107
Spread sheet 12 (1989) 253
Surface mount process 12 (1989) 31
Systems design 12 (1989) 153

Ternary image 12 (1989) 31
Timed Petri net 12 (1989) 347
Topographical modeling 12 (1989) 203
Trajectory-wise coordination 12 (1989) 285
Travelling salesman 12 (1989) 31
Tree 12 (1989) 193
Triangular irregular network 12 (1989) 203
Turning-off regulation 12 (1989) 49
Two coordinating robots 12 (1989) 285

Windowing 12 (1989) 13
